

Maths

Further Multiplication and division:

The first few lessons look at decomposing a number into tens and ones so that the multiplication is easily managed and pupils can see the concept using Base 10 blocks. Lessons move onto multiplying where regrouping is necessary before pupils start to look at division. Decomposing numbers is critical in making both multiplication and division manageable for pupils and this is practised throughout the chapter.

Mass and weighing

This chapter covers mass. The chapter begins with measuring mass using scales. Pupils look at different units to measure mass, specifically grams and kilograms. They will become well-versed in reading weighing scales that have different values for each marking. Once raw skills are achieved, pupils will attempt basic word problems which will extend to more challenging word problems. There will also be more exposure to bar modelling, which will be the key strategy used to solve the word problems.

Volume

This chapter introduces volume and capacity. Pupils will learn to measure volume using millilitres and litres. They will also come across various problem-solving questions on volume and capacity.

Spring 1

PE

Ball Skills

The children have opportunities to develop a variety of ball skills without the restrictions of specific rules related to well-known games. They will develop their accuracy and consistency when tracking a ball, explore a variety of throwing techniques and learn to select the appropriate throw for the situation. They will develop catching with one and two hands as well as dribbling with feet and hands. These skills are applied to small group games. Pupils will have the opportunity to take on different roles and work both individually and with others

Gymnastics

The children develop balancing, rolling and jumping. They use these skills individually and in combination. Pupils develop their sequence work, collaborating with others to use matching and contrasting actions and shapes and develop linking sequences smoothly with actions that flow. Pupils develop their confidence to perform, considering the quality and control of their actions.

Religious Education

What is the Trinity and why is it important for Christians?

In this unit the children will learn how and why Christians see God as a Trinity. They will learn what a 'Gospel' is and learn to recognise some stories from the Christian Gospels.

Music

Instruments with Mrs. Zaman

PSHE

Citizenship, Diversity and Communities

In this unit of PSHE the children will look at their identity and begin to understand the other aspects of people's identities. They will look at how detrimental stereotypes can be to people's emotions and how to challenges these stereotypes. The children will look at the different groups and communities they may belong to and the roles of different people in the community. They will look at how they can help look after the local community and environment.

MFL

The children will build on their counting knowledge and continue to use them in games. They will reflect and practice the vocabulary to date.
